Our Colors

Lions Lions

And so the motion when you came out
I can see the lights fading out of time
And bury the sun beneath the ocean
every time I see the colors I?m alive

And the colors wrapped around your fingers never been so bright
And the colors wrapped around your finger never been so blinding
Stand up
It?s so easy to fall, and forget it all
Don?t give up
Take a stand and the words will outlive them all

So bottle it up beneath the pressure, slowly moving towards the answer you will find
Letting go of all you built up, seeing the path was set in motion all this time

And the colors wrapped around your fingers never been so bright
And the colors wrapped around your fingers never been so blinding
Stand up
It?s so easy to fall, and forget it all
Don?t give up
Take a stand and the words will outlive them all

We?re all too complicating
Washed out, the colors are fading
Never been a better time
And we?ve been burning to the wire
It?s time to burn the pages
We messed up and now we?re left jaded
I laid it all on the line
Ill be the one to stoke the fire

Stand up
It?s so easy to fall, and forget it all
Don?t give up
Take a stand and the words will outlive them all
