

# Speak in Tongues

## Placebo

Kitty came back home from on the island  
But kitty came on home without a name  
She and me's a history for violence  
So I long, I burn to touch her just the same  
So we both can both can speak in tongues  
So we both can both can speak in tongues  
Every single sense in me is heightened  
There's nothing left inside to rearrange  
Like a slave to history and science  
I long, I burn to touch you just the same  
So we both can both can speak in tongues  
So we both can both can speak in tongues  
Until the universe is done  
And the course of time has run  
So we both can both can speak in tongues  
Don't let them get their way  
Don't let them have their way  
You're beautiful and so blase  
So please don't let them have their way  
Don't fall back into the decay  
There is no law we must obey  
So please don't let them have their way  
Don't give in to yesterday  
We can build a new tomorrow, today  
We can build a new tomorrow, today  
We can build a new tomorrow, today  
We can build a new tomorrow, today
