

# The Night

## The Perishers

I guess you feel hurt, well I'm feeling hurt too  
Feel free to blame me, if you don't already do  
But I want you to know that I'd change if I could  
I wanna make sure that that's well understood  
The night, a journey through dark towards light  
Despite your glowing eyes this is night  
And all is calm, we're safe, we're warm  
The night  
I guess you feel lost well I'm feeling lost too  
Feel free to hate me if you don't already do  
But I want you to know that I've always been true  
If you promise to help me then I will help you through  
The night, this journey through dark towards light  
Despite your glowing eyes this is night  
All is calm, all is calm  
The night  
Let's make sure that we'll do what's right  
The night  
This journey through black towards white  
And all is calm, we're safe, we're warm  
The night
