Someone Like Me

Charlie Worsham

You're dancing with the crowd in the city of lights
All the boys spin around you like satellites
Be the spark in their hearts, say goodnight
Then you're gone.You keep your toes on the ledge of the line you've drawn
Looking over the edge but you don't fall
Bet you got a lot of numbers you don't call
You're never and always alone.(If you ever)
If you're ever gonna love someone then
Maybe you can love someone like me
(If you ever)
Baby if you ever do stop rollin'
Maybe you can love someone like meI can barely breathe in your cloud of dust
My skin's still burnt from one more touch
Oh but one more touch is never enough
You see.I will run with you through an ancient town
Gonna lay with you on sacred ground
Do you see that I could be the type
That never ties you down?(If you ever)
If you're ever gonna love someone then
Maybe you can love someone like me
(If you ever)
Baby if you ever do stop rollin'
Maybe you can love someone like me
Someone like meOh, you're just a dot on that horizon line
I can't hold on to what was never mine
But it ain't what left behind
That won't let me sleep.(If you ever, if you ever)
If you're ever gonna love someone then
Maybe you can love someone like me
(If you ever)
Oh baby if you ever do stop rollin'
Maybe you can love someone like me
Someone like me
