

# Bumpy Ride

Robyn

Sometimes life can be a bumpy ride  
Sometimes it feels like you're drivin' with covered eyes  
And you listen to your friend who's in the car by your side  
They say they've got your map, what if your friends are tellin' lies? So listen to you heart 'cause you can't see  
no road signs  
You don't know where to stop or where to turn  
Everyone goes through it I'm in the middle of mine  
And I try to remember, it's the only way to learn You've gotta hold on You gotta stay real and true to yourself in  
the game of  
Becomin' a woman where the rules never stay the same  
Remember who you are, who made you and who's keepin' you here  
Who's makin' you not duck from problems in fear People in your way, dogs and bitches  
Who's lickin' your ass? Liars and snitches Even though it's a bumpy ride  
Keep your head above the waterline  
Keep focused and you'll make it through  
Keep on rollin' is what you got to do  
Even though it's a bumpy ride  
Don't you slip and don't you slide  
Love will be there in the end  
When you come around that bend You've gotta hold on You've gotta keep your flow smooth, never hesitate  
Never stop believin' always keepin' the faith  
But always be critical never naive  
'Cause if you can be that there's so much more you can achieve  
Maybe then when you're grown up satisfied and strong  
Maybe then you will be happy, happy that you held on Even though it's a bumpy ride  
Keep your head above the waterline  
Keep focused and you'll make it through  
Keep on rollin' is what you've got to do  
Even though it's a bumpy ride  
Don't you slip and don't you slide  
Love will be there in the end  
When you come around that bend Even though it's a bumpy ride  
Keep your head above the waterline  
Keep focused and you'll make it through  
Keep on rollin' is what you've got to do  
Even though it's a bumpy ride  
Don't you slip and don't you slide  
Love will be there in the end  
When you come around that bend Even though it's a bumpy ride

Keep your head above the waterline  
Keep focused and you'll make it through  
Keep on rollin' is what you've got to do  
Even though it's a bumpy ride  
Don't you slip and don't you slide  
Love will be there in the end  
When you come around that bend You've gotta hold on  
You've gotta hold on  
You've gotta hold on  
You've gotta hold on
