Black Sun

Primal Fear

There're so many light years to come
There're so many light years behind us
There're so many things we have done
And so many suns which have blinded usWe're shining in lightning
Look to the sky and you'll see us
Sensation, damnation
We're hungry and we're curiousMetal eagles flying side by side
Silver heroes hear our criesOn a mission to another world
On a mission, we're riding
On a mission, our spell is done
On a mission to the black sunIn search for the light of our lives
In search for the light of our freedom
To rescue the entire mankind
To keep all our hope we believe inMetal eagles flying side by side
Silver heroes hear our criesOn a mission to another world
On a mission, we're riding
On a mission, our spell is done
On a mission to the black sun
