# Brainticket Blues

## Brainticket

what have we done
what have we doneanother fate
another mind
another face in time
if you want to reach those sonic heights
you've got to pay your cosmic dues
the game may change but the name remains
Brainticket blues
Brainticket bluesblack dwarf
white hole
rings of Saturn
human soul
as meteorite burns to earthly pebble
a little space rock in your shoe
the journey's long but the song goes on
Brainticket blues
Brainticket blueswhat have we done
what have we donealien forms
infinite ocean
the rhythm of stars
celestial motionmoondust
sound eye
Ra and Horus
sun and sky
I've got strangers in my antechamber
vibrations cast in synthesized hues
we've traveled far to be where we are
Brainticket blues
Brainticket bluesquarks, neurons
connective branches
the river of being
ephemeral tranceswhat have we done
what have we done
and can it be undoneeast west
cultures collide
societies committing suicide
there are reactions in fractions
great vestibules in molecules
may mystery's fire sustain our desire

Brainticket blues
Brainticket blues
