## **Lost In a Contraption**

## **CKY**

I was lost in a contraption
Took me days to find direction
Suddenly the moments collideFinally found the fault in father
Family blood dilutes the water
I was dazed in my direction tonightPhotographed when he hit the ground
No one minds
That's my blind sideI was lost and you're to blame
A man of doubt gave me a name
The obvious was too hard to findTo watch me try is out of line
The sun will shineTo watch me die
Is out of line
The sun will still shine what's mine is mine
The sun will still shine
