Birds Of Prey

Kaada

Suddenly lost inside a fantasy
Everything not quite what it seems to be
Slipping and falling through the looking glass
Catching a glimpse at all that lies behind the masks
You disappear with the dawn
You only see what you want
When you are out with the birds of prey
When you are out with the birds of prey
They watch and they feed, they take what they need
They bite as you bleed, the birds of prey
Taking the blue pill only made you cry
And all that the red pill did was make you forget why
There is no right, there's no wrong
You only see what you want
When you are out with the birds of prey
They watch and they feed, they take what they need
They bite as you bleed, the birds of prey
They watch and they feed, they take what they need
They bite as you bleed, the birds of prey
They watch and they feed, they take what they need
They bite as you bleed, the birds of prey
They watch and they feed, they take what they need
They bite as you bleed, the birds of prey
You disappear with the dawn
You only see what you want
There is no right, there's no wrong
You only see what you want
When you are out with the birds of prey
When you are out with the birds of prey
When you are out with the birds of prey
When you are out with the birds of prey
When you are out with the birds of prey
