

# I Need Love

Laura Pausini

I'd cross that desert to be where you are  
All the things I do to be close to you  
A million miles wouldn't seem that far  
I'd go anywhere just to win your heart But wherever this leads  
There's somethin' I need I need love  
The kind that makes you wanna live  
The kind that makes you wanna breathe  
The kind that makes you feel too much  
And I need you to help me find a better way  
And I guess you never thought you'd hear me say  
"I need love"  
I need love, I need love And when I see you I just lose my mind  
You're the everything, I thought I'd never find  
Must be an angel watching over me  
With a little luck, we're gonna make you mine 'Cause I wanna believe  
In all we can be I need love  
The kind that makes you wanna live  
The kind that makes you wanna breathe  
The kind that makes you feel too much  
And I need you to help me find a better way  
And I guess you never thought you'd hear me say And I, I will catch you when you fall  
Be the greatest love of all  
I promise to be  
If you give me all I need, I need I need love  
The kind that makes you wanna live  
The kind that makes you wanna breathe  
The kind that makes you feel too much I need you  
The one that makes you wanna live  
The one that makes you wanna breathe  
The one that makes you feel too much  
And I need you to help me find a better way  
And I guess you never thought you'd hear me say  
I need love, I need love 'cuz I need love baby, I need love I'd cross the desert  
I'd cross the desert to be where you are
