Without You

Ian Van Dahl

Did you ever mean the words you said That forever you'd be mine
I'm trying hard to understand Why you left it all behind
Now, the past just seems so far away But time cannot ease my pain
In my mind I still see your face Why did it have to end this way
It feels cold inside Without you by my side Searching for an answer A reason why
It feels cold inside Without you by my side Longing for you day and night
Now your heart belongs to someone else But still I'm hanging on to hope
So many answers I can't find Why you left me all alone
Time stood still the day you walked away Life will never be the same
I wonder if you ever cared for me Or was I just another fool
It feels cold inside Without you by my side Searching for an answer A reason why
It feels cold inside Without you by my side Longing for you day and night
Day and night
Time stood still the day you walked away Life will never be the same
