

# Long Way Down

## The Boneshakers

I've been watching' you  
being where it's at  
You seem to feel  
there's nothing wrong with that  
Still you must have days  
when you feel the lack  
of someone you can talk to  
Who's not afraid to talk right back

You've learned so well to compromise  
You must have damaged your pretty little eyes

It's a long way down... could be a fatal drop  
It's a long way down... to the bottom from the top  
It's a long way down... did you think that you could fly?  
It's a long way down... you say that you get it  
but you don't know

All those dreams you had  
have finally come true  
Now everyone wants a piece of you  
You've worked hard for this  
Have yourself some fun  
But don't you buy their story  
When they tell you you're the only one

Or you could be next in a long, long line  
of visionaries who have gone blind

It's a long way down... could be a fatal drop  
It's a long way down... to the bottom from the top  
It's a long way down... did you think that you could fly?  
It's a long way down... you say that you get it  
but you don't know

It's sad, so sad  
Just when you thought your place was assured  
Come to find you  
See behind you

A new king waiting to show you the door
