One X One

Paul Weller

Share your dreams
Give us all the beam we need
Like electric lights in a ballroom scene
Going on one times oneShed your chains
To earth like dew and all remain
Forever in another vein
As you slip into another streamOh, give your love
Give us everything you've got
The world's a better place for that
When you have love to giveDon't fear not
Not where you're tread
It's only
[Incomprehensible]Head that sign
For all of us who wait in line
Waiting for the words to rhyme
Bringing on a brand new dayOh, give your love
Give us everything you've got
The world's a better place for that
When you have love to giveDon't fear not
Not where you're tread
It's only
[Incomprehensible]Don't fear not
Not where you're treadSo dance little sister, dance
Like you've never danced before
It's just a moment we're going through
This is the new dance that we doSo sing little brother, sing
And turn on everyone
Lift their spirits high
To a place we need to findShare your dreams
Give us all the beam we need
Like electric lights in a ballroom scene
Going on one times oneShed your chains
To earth like dew and all remain
Forever in another vein
Going on one times oneOne times one
Going on one times one
Yeah, one times one
Going on one times one
Yeah, one times one

Going on one times one
