

Outta This World

Kiss

Ah yeah!
I was born to the human race
Livin' life feelin' out of place
People said I was wasting my time
Looking to find my kind I saw you and I realized
You got the fire burnin' in your eyes
Let's get away, leave it all behind
I'm ready to blow your mind I'll take you out of this world (to the other side)
On a midnight rocket ('til the morning light)
Going up, going down (it's gonna be alright)
I'll take you out of this world tonight You and me we're like TNT
Light the fuse that's inside of me
You get your ticket when you understand
I'm ready to be your man You got a hunger baby there's no doubt
You got desire - gotta get it out
I'll free your body, if you free your soul
If you're ready to rock
I'm ready to roll I see the glow
Burnin' down the midnight sky
I feel the flow
I'm gonna take you high I see the glow
Burnin' down the midnight sky
I feel the flow
I'm gonna take you high
C'mon! Yeah!
I'll take you out of this world
Take you out of this world
On a midnight rocket
I'll take you out of this world tonight Outta this world
Outta this world
Outta this world tonight
Outta this world
Outta this world
Outta this world tonight
Outta this world
Outta this world
Outta this world tonight
