

Nerve

K.G.Kid

Call it liberation or frustration
As it hits like a bomb
Tearing you apart as you're first in line
Entering the zone
Watch how it runs
A nerve wrecking resistance
Watch how it burns
A venomous script's getting formed
You've traveled a long way to get here
And now its waking you up
Waking you up
Walk straight for a final solution
Walk straight, don't you be so cold
Walk straight with a clear resolution
I'll state my case and never turn
Watch how it runs, watch how it burns
And it's all a deception
Break it and learn, there's no return
For a presence like mine
You've traveled a long way to get here
It's getting all so clear now all the things at least
An elapse of conscious progress will last forevermore
My courageous insanity follows an infinite time
I'll be attaching the world on my shoulders
Without a look inside
Inside
Walk straight for a final solution
Walk straight, don't you be so cold
Walk straight with a clear resolution
I'll state my case and never turn
Walk straight for a final solution
Walk straight, don't you be so cold
Walk straight with a clear resolution
