

# Dead Lovers' Lane

HIM

Despair has a face  
And all these wounds remain unhealed  
Blessed to kill and enslaved  
Are all hearts around love's will  
Thrilled to start all over againCrawl down dead lover's lane  
The maze of memories stained  
And suck the blood right out of my heartFear has a name  
Written on unhallowed ground with dead leaves  
Those words never fail  
To feed the hunger that dreams  
Our needs beyond God's graspCrawl down dead lover's lane  
The maze of memories stained  
And suck the blood right out of my heartScream out love's name in vain  
Embrace the pain again  
And lose yourself alone in the dark  
Dead lover's laneCrawl down dead lover's lane  
The maze of memories stained  
And suck the blood right out of my heartScream out love's name in vain  
Embrace the pain again  
And lose yourself alone in the dark  
And suck the blood right out of my heartDead lover's lane  
Right out of my heart  
Dead lover's lane
