

Shine

Ricky Martin

We can talk, you can make your demands
We can cry cast the tears in our heads
We can laugh and dance
Under this steady moon
And when the morning comes
I'll still be holding you
Shine brighter than a rain of falling stars
Time stops to let our hearts be synchronized
This endless night is no goodbye
This moment will last forever,
This moment will last forever,
I know you would catch me
Should I fall from grace
If I heard you drowning in the dark
I'd dive into the waves
courtesy of OriginalLyric.Info
We can make a vow and seal it with a kiss
The moments that we shared will matter more
Than those we missed

Shine brighter than a rain of falling stars
Time stops to let our hearts be synchronized
This endless night is no goodbye
This moment will last forever,
This moment will last forever
In another place, in another time
In another space, in another life
In another world you could still be mine
We'll shine, we'll shine
Shine, brighter than a rain of fallen stars
Time stops to let our hearts be synchronized
This endless night is no goodbye
Shine brighter than a rain of falling stars
Time stops to let our hearts be synchronized
This endless night is no goodbye
This moment will last forever,
This moment will last forever.
This moment will last forever,
This moment will last forever.
