

Love Science

Todd Rundgren

I've been around the world, I'm going around again
I got a new word up, gonna lay it on my friends
I'm still too young, I've got these emotions in my blood
But when I grow up, gonna be a scientist of love
Working on, love science
Got to know, love science
Show the world, love science
How to be a scientist of love
Tell my friends, love science
Take a chance, love science
Give it up, love science
I'm a scientist of love
Feel the power, love science
Study hard, love science
Know the truth, love science
Be a scientist of love
Choose a plan, love science
Pick 'em up, put 'em down, love science
Bring it on home, love science
Got to be a scientist of love
Hey you!
Sometimes you get screwed up, and you're looking for a cure
But you don't want to see just another amateur
I know the kind of expert you must be thinking of
Go out and find yourself a scientist of love
Some say that love's a game, a random circumstance
I'm not the type to leave that kind of thing to chance
You might sit back and wait, but I'm taking off the gloves
I'm gonna crack this case like a scientist of love
1, 2, 3!
If love's what we want, if love's what we need
Why can't we make love from suspicion and greed?
If love's what we want, if love's what we need
Why can't we make love?
I've got no time to waste just waiting for the bus
This is the place, the space to get down and serious
School is in, the lab is open for research
I do declare that love is a walking, talking church
I've got to quell the beast, be a credit to my sex
I've got to give at least as much as I expect
Can't get no rest 'til I discover what I need
Gotta start somewhere, that why I believe, believe, believe
Believe the word, love science
Party down, love science
Thinking hard, love science

How to be a scientist of love
Place to place, love science
Hour to hour, love science
Can't hold back, love science
Got to be a scientist of love
Sexy girl, love science
Mannish boy, love science
Take the course, love science
And be a scientist of love
In your face, love science
Outer space, love science
Here's a taste, love science
Got to be a scientist of love
If love's what we want, if love's what we need
Why can't we make love in a love factory?
If love's what we want, if love's what we need
Why can't we make love?
