

# Feel OK

## eleventyseven

If you're like me you make believe  
That everything that could possibly  
Go wrong is gonna happen here tonight  
And if you're like me you're on the brink  
Of telling everybody what you think  
As if what I had to say was important anyway  
The first mistake that you and I could make  
Is trying way too hard to compensate  
'Cause I don't have to feel ok to be ok  
I wasn't created just to live my life this way  
I don't have to feel ok to be ok  
And I refuse to live my life this way  
If you're like me you lie awake  
Scared to death of your mistakes  
Somehow coming back to claim your soul  
And if you're like me you're wondering  
When everybody else is gonna see  
All the stupid things you do  
To keep the past away from you  
The first result of everything we've done  
Is living life but never having one  
My first impression is I don't think that depression is  
The tyrant that we make it out to be  
Your life is yours to live for something way more positive  
Than what you woke up feeling like today
