## The Sun Also Sets

## **Ryan Adams**

When you get the time
Sit down and write me a letter
When you're feeling better
Drop me a lineI wanna know how it all works out
I had a feeling we were fading out
I didn't know that people faded out so fast
That people faded outWhen there was love enough left to fix it
But, there it isThere it is, we are only one push from the nest
There it is, we are only one argument from deaf
There it is, the sun rises

But the, the sun also sets, the sun sets, the sun also setsWhen you get these feelings, next time, next time Oh, be sure, you're gonna tear someone apartI wanna know how it all works out

I had a feeling we were fading out I didn't know that people faded out

That people faded out so fastI wanna show you what I've got inside

But you know those parts of me died

Just like that they faded out, they faded out so fastAnd there was love enough left to fix it But, there it isThere it is, we are only one shove from the nest

There it is, we are only one argument from deaf
There it is, we are only one moment from death
There it is, we are only one push from the nestThere it is, there it is
There it is, we are only one push from the nest
There it is, we are only one moment from death
There it is, the sun rises

But the, the sun also sets, the sun sets, the sun also sets
