River

Together Pangea

Take it outside to the beat of the earth
Beat back the waves and beat back your birth
To be, to best something
Vital is the talk is vitality
Drinking 40s in the street means losing a day
But so what? You have to lose some things
You're bombing down the street like it's a fucking parade
But when it all dries up, you're gonna feel the pain of excess, of waste, and wanting
looking at the river cause the river can run
looking at the river cause the river can run
looking at the river cause the river it can run
looking at the river cause the river can run
looking at the river cause the river can run
looking at the river cause the river it can run
