

# Signal 30 (Justin Robertson Deadstock 33s Remix)

## Public Service Broadcasting

There's trouble ahead  
Trouble that may or may not be a signal 30  
What will we find?  
A minor mishap or will we look upon the stark face of death? There's been an accident at Crimble road on the  
expressway  
You say two persons have been killed, there are several others injured  
Have you called an ambulance?  
Okay on the signal 30 in route  
I'll be on the signal 30 in route This is the result of driving carelessly  
With only casual attention given to the important mechanics Hey you  
I'd like to get a look at that dude  
Oh smart Eh? Why don't you get some glasses so you can read those signs?  
This is the kind of a guy who made the automobile people think of hydraulic brakes You're driving a little too  
fast and have a false sense of confidence  
Watch it You've really got something here  
No drinking and driving  
Not even beer?  
Not even water  
I'd rather be a racing driver with a car that could go places  
Now just a minute my boy Hey, why don't you look where you're going  
There's a road-hog if I ever saw one  
How did you ever get a licence to drive  
Get out of that car and I'll C'mon, I'll give you a real ride Please no, no not again  
Let me out of this car  
Somebody let me out this car
