

Leave Your Light On

Night Moves

So leave your light on
Don't remind me that you've gone
In the days it takes me back
Pains me in waiting, though you've taken nothing at all
Now, it's good and bad
Evidence you've never had
In the daze and it takes me back
Lovin' you, lovin' you, some days I wish it had last
I thought I knew you
Lovin' you, lovin' you, some days that I wish I had
It's a hotel room, blessed with a kind of grace
With Olympian ecstasy you've run along your age
And I thought I knew you'd go
I'm just looking for you to save me from my future cell
Won't you love me, Won't you hold me
As I am needing someone else
Want you to love me tonight
Want you to love me tonight
As there is no other I'd have shine...
So leave your light on
Still I'm wondering just where you've gone
Steal the days and it takes me back
Lovingly, lovingly
Somedays
I wish it had last
You've got a slow ride home
You've got a slow ride home
And you've always had something around you that I never would own
I thought I knew you'd go
I thought I knew you
I'm just looking for you to save me from my future cell
Won't you love me, won't you hold me
As I am needing somebody else--someone else.
Want you to love me tonight
Want you to love me tonight
As there is no other I'd have shine
