Jazzie's Groove

Soul II Soul

Where is Soul II Soul?
Where is the sound system?
An amalgamation of good dance music
There are three of us from the north side
And two from the east
Through our style people just came
To recognize us as the funky dreadsTrust has always meant a lot of us
For us to stay together would make a decision
And the rest would follow
That's the way we through things should be
I guess the way things should go
Soul II SoulI don't know, it took us a real long time
To get things together, you know
But hopefully we're on our wayYeah, we started in clubs and so on
A little bit of pressure and there
You know we had our ops and downs
For everybody that can remember Africa Center
The Center of the World
That gave us the idea to make our music
Creating our own styles here in London
