

A Better Place

David Cullen & Michael Manring

[Verse 1:] I wish we could live forever but everyone dies

Everyone laughs and everyone cries

I'd be mad but I'm glad you apart of my life

Make sure you stop by my dreams when I'm sleepin at night

Now a piece of my heart is lookin down from the sky

Like an angel on my shoulder helpin me to get by

And all the words that you told me were words of the wise

To navigate my path through the drama and lies

[Pre-Chorus:] I won't forget you

and I'll keep loving you

but it's hard to live my life when you are not around

I'll try to make it through

I know you want me to

But it's hard to think of you without me breakin down

[Chorus:] I know you're in a better place

I know you finally feel your pain

I miss you my best friend

I'll never find someone like you again

[Verse 2:]

I try to stay optomistic but it hurts so bad

For me to lose a best friend that I'll probably ever have

Now everyday when I wake I see how precious life is

Maybe someday you'll come back as one of my kids

It's crazy things change how hard life can be

I remember we were young everything seemed so easy

I had you by my side and i thought you'd never leave me

And even though you're gone you still never will believe me

[Pre-Chorus][Chorus][Verse 3:] we're born to live and we live to die

walk on the ground as though through the sky and

we're born to live and we don't ask why

transcend and reside where stone angels cry

we're born to live and we live to die

walk on the ground as though through the sky and

we're born to live and we don't ask why

transcend and reside where stone angels cry

[Chorus]
