Everything'll Be Made Right

Superdrag

Woes, devils incognito
Psychological mosquito
Disinterred the question
Raised by the power of suggestionI just wanna be your man
Reach in there and take you by the hand
If I could I'd take the pain
Take on the impossible for you
I hear you calling out
Who could blame you for wigging out?But when you run I follow
It may be hard to swallow for a time
But everything'll be made right
If you run I'll chase you
The past cannot debase you every night
Everything'll be made rightBroke, broke in two, a breakthrough
What you don't know can remake you
You exhume the answer
Parasite in necromancerI just wanna testify
Paint the truth impasto over the lie
If I could I'd take the weight
Take on the impossible for you
I hear you calling out
Who could blame you for wigging out?When you run I follow
It may be hard to swallow for a time
But everything'll be made right
If you run I'll chase you
The past cannot debase you every night
Everything'll be made right
Every night, everything'll be made right, yeah
