Delivering The Goods

Iron Savior

Feeling like we're, ready to kick tonight
No hesitating, my bodies aching
Looking for some action, satisfaction all right
Charging, vein faced, as active as one-hundred solid proof
Mega town, Leviathan, we're ready to hit the roofYou better watch out and hold on tight
We're heading your way like dynamiteDelivering the goods
Delivering the goodsShake down, rock 'em boys, crack that whip strap mean
Pulse rave, air waves, battle lies in every place we've been
Stealing your hearts all across the land
Hot blood doing good, we're going to load you with our brandYou better watch out and hold on tight
We're heading your way like dynamiteDelivering the goods
Delivering the goodsHave your way stealing your hearts well we don't pull no punches
We aim where the crunch is the bound to do most damage to your brain
If you're looking for it mellow you're nothing more than yellow
Gonna do it again and againWe'll beat you to submission
So you might as well surrender
You do gotta learn your lesson
'Cause there ain't nobody here to defend your heartFaster, higher till it seems that we're gonna break
Oh shootin' further, giving more than you're ever gonna take
Weaving with your heads crushed out on the floor
Begging for mercy be careful or we'll do it some moreYou better watch out and hold on tight
We're heading your way like dynamiteDelivering the goods
Delivering the goods
