Political

Sarkodie

It will take some time for me
To get the point of what
Was wrong with this
I saw it was
Too many cold
Too many scared
And bold and failed
Turn on the lights
And watch me run
You will follow me to the end
You will see
I will take care of everything
And I will make you better off
I assure you
And you won't even be around
And you won't say a word to cope
And I will ask the better ones
How come you lie
How come you ain't a part of us
You will see
And you will always watch for me
You will see
And you will always watch for me
Turn on the lights
And watch me run
You will follow me to the end
You will seeAnd you will always watch for me
I will take care of everything
And I will make you better off
I assure you
You will see meYou will see
And you will always watch for me
You will see me
Turn on the lights
And watch me run
You will follow me to the end
You will see
I will take care of everything
And I will make you better off

I assure you
You will see
You will see
You will see
You will see me.
