When You Go

Lightning Dust

You can settle down in Mexico
Runaway join a circus show
Whatever, baby it's alright with me
Take a walk in the pouring rain
Sky dive from a jet airplane
Love like ours is all about being free
There's two chairs on the front porch
One's yours and one is mine
Four wheels in the driveway
That'll take us across the line
It doesn't really matter
If you wanna rock or roll
Just take me with you when you go
Swim the ocean for a million pearls
Hitch hike all the way around the world
Fly to the moon in a rocket ship I don't care
Ride a camel cross the desert sand
Sail away to never never land
Imagination can take you anywhere
So be the hero that rides off into the sun
Or a wild raging river always on the run
Change direction like the strong four winds that blow
Just take me with you when you go
Today, tomorrow and forever every turn you make
I want to be there, I want to be there
Live like a gypsy
Chase your distant dreams
Or get lost in the blues on
Bourbon Street down in New Orleans
Believe in Heaven
If you want to save your soul
Just take me with you when you go
Just take me with you when you go
