

# Gone

## Leverage

I see you in my dreams  
I can't escape the song memories  
I wonder how I'll ever move on when your gone

I'm not a drifter anymore  
I dumped that road, had enough, I'd seen it all  
I wonder how my heart will move on when your gone  
When our love is gone

If love can live eternally  
The million years a thousand centuries  
Why do our foolish hearts swear to look forever  
Why do we take that road if we can't stay on it together

Is it only make believe  
Is it only broken hearts and empty dreams  
I wonder how my heart will move on when your gone  
When our love is gone

If love can live eternally  
A million years a thousand centuries  
Why do our foolish hearts swear to look forever  
Why do we take that road if we can't stay on it together

When the love has gone  
How can our hearts move on  
When the love has gone

If love can live eternally  
A million years a thousand centuries  
Why do our foolish hearts swear to look forever  
Why do we take that road if we can't stay on it together

When the love has gone  
How can our hearts move on  
When the love has gone  
How can our hearts move on

Move on

Move on

Move on

Move on

How can our hearts move on

When our love has gone
