World's On Fire

Prodigy

The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
And it's too close to the wire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
And it's about to expire
The world's on fire
The world's on fire
The world's on fire
And it's about to expire
Too close, you're too close
Too close, too close to the wire
Too close, you're too close
Too close, your world's on fire
You're so special
You're so special
You're so special
Why aren't you dead?
Three, two, one, zero

The world's on fire
The world's on fire
The world's on fire
The world's on fire
And it's about to expire

Too close, you're too close
Too close, too close to the wire
Too close, you're too close
Too close, your world's on fire
You're so special
You're so special
You're so special
Why aren't you dead?
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
The world's on fire
Too close, too close
You're too close to the wire
Too close, too close
You're too close to the wire
Too close, too close
You're too close to the wire
Too close

You're too close to the wire
Too close
You're too close to the wire
Too close
You're too close to the wire
