

# Whispering Endearments

[Ari Herstand](#)

Whats the name that you speak  
when you close your eyes and fall to sleep  
Am I the one in your dreams  
or when you wake will you leave me  
Last night you breathed into my ear  
whispering endearments unclear  
You never spoke that way to me before  
I just hope its me you meant them for  
Im waiting for you to break my heart  
so I can move on with life and restart  
I am stuck inside your every move  
Im waiting for you to break my heart  
We go out on the town  
I take your hand spin you around  
You turn to me and lock eyes  
and for a moment I lose my sight  
Its not that I cant be alone  
on the contrary Ive lived till now on my own  
But every time I make you laugh  
you tickle my heart and Im right back in love  
Im waiting for you to break my heart  
so I can move on with life and restart  
I am stuck and dont know what to do  
Im waiting for you to break my heart
