

Crystal Heart

Jasmine Thompson

I see the world in stars and laser beams The future's bright in my kaleidoscope of dreams
I feel so shatterproof 'til you look me in the eyes

Somehow you see my truth like particles of light
So shine a light through me

I will let you in, let you in

But I can't break so easily

Underneath the skin, neath the skin I've got a crys-crys-crystal heart x3
I've got a crystal, crystal heart I'll take a leap of faith
don't let me fall

You always raise me up by breaking down my walls
I feel so shatterproof 'til you look me in the eyes

Somehow you see my truth like particles of light
So shine a light through me

I will let you in, let you in

But I can't break so easily

Underneath the skin, neath the skin I've got a crys-crys-crystal heart x3
I've got a crystal, crystal heart Shine your light through me

I won't hide

But you can't help falling

If you don't mind
So shine a light through me

I will let you in, let you in

But I can't break so easily

Underneath the skin, neath the skin I've got a crys-crys-crystal heart x3
I've got a crystal, crystal heart
