

Lipid

The Daily News

Well I guess its time to explain,
So I digress, and I digress,
And I wait until there air is here,
Riding on the back of the atmosphere,
Its clear,They try to use me for artificial intelligence,
They try to use me, it makes no sense,I can't wait no more,
This process is taking so long,
So so long,
I just can't help it,
I don't even know if its healthy,
But its getting out of control,They try to use me for artificial intelligence,
They try to use me, seems like I'm barely getting by,
While I'm waiting out at sea,
But this song as company,
It bounces right off of me,
And I cease, and then decease,

Song Discussions is protected by U.S. Patent 9401941. Other patents pending.
