

Done (Wild Version)

[Sarah Brightman](#)

I have seen
New times have come, to feel in touch
With what is real
The mission's calling each one of us
One blue sky
For us to share
For us to fly And all the things left undone
Shall be Done, done, done, done
And all the things left undone
Shall be Done, done, done, done
Done, done, done You're a Star
You are the future that travels far
Touch and Bring
Millions of hearts to share and sing
Hopes are high
A new Beginning
For you and I And all the things left undone
Shall be Done, done, done, done
And all the things left undone
Shall be Done, done, done, done
Done, done, done And on and on we will go on
Until we master our desire
To make this world
A better place And all the things left undone
Will be Done, done, done, done
And all the things left undone
Will be Done, done, done, done
And all the things left undone
Will be Done, done, done, done
And all the things left undone
Will be Done, done, done, done
Done, done, done
