# Strangest Friends

## Neil Finn

This could be a chance to see
With my own eyes
A carousel or a diving bell
Designs bizarre be in the skyThey're here with us
They believe in us
And they come from on high
Do they travel in the wilderness too
And they needed us and they seeded us
It's a door to the future
For a couple of impressionist kidsWhen they land on the grass tonight
There'll be cartoons of flaming heads
There'll be colourful flags to fly
You're my starlight companionAnd when you dance
They really captivate your heart
They make you lose your head
They are the strangest friends you got
We are the audience
Who is love with them
They are the strangest friends you got
And don't forget to say thanks a lotWhen they land on the grass tonight
There'll be cartoons of flaming heads
There'll be colourful flags to fly
When they land on the grass tonight
And they take your souls away
That's all part of their game
When strange friends come out to play
