

Superhuman Touch (Live at Union Chapel)

Athlete

I'm on fire
Nothing's gonna hold me back
Endless blue sky
And a pocketful of tricks to try Oh, you pick a color and I sing it for you
I know you feel the same way
Say, say, say you feel the same way Your fingertips are like superhuman touch
Can't get enough of this electric love
Burning the sun with just a wave of your hand The sparks flying out in every direction
There's more of this to come, I think it must be heaven
Burning the sun with just a wave of your hand I'm on fire
Golden echoes upon my face
Tell those dreamers
They can dream up all they like in this place Oh, you pick the color and I sing it for you
I know you feel the same way
Say, say, say you feel the same way Your fingertips are like superhuman touch
Can't get enough of this electric love
Burning the sun with just a wave of your hand Sparks flying out in every direction
There's more of this to come, I think it must be heaven
Burning the sun with just a wave of your hand And just one day like this will keep me going on
Tender kisses will keep me going on, oh Your fingertips are like superhuman touch
Can't get enough of this electric love
Burning the sun with just a wave of your hand Sparks flying out in every direction
There's more of this to come, I think it must be heaven
Burning the sun with just a wave of your hand Seems like hell has broken loose
It couldn't be more beautiful
I just want to burn the sun with you The messed up garden to inspire
The greatest minds in all of power
I just want to burn the sun with you
And just a wave of your hand
