

# Touch

Stacy Barthe

7 whole days, 7 whole nights  
I can't wait to get you by my side  
So you can touch me  
Oh, how I need you so much  
My body calls out  
Please, come and touch me  
Too long since I've had some  
I need to feel your touch  
Craving your touch  
Saving my love for the next time  
I'm yours, you're mine  
Baby, we'll be exciting  
When we meet up that night  
Two sparks ignite  
It's funny how a week  
Seems like eternity  
I want to feel you near  
Can you get here?  
Oh, how I need you so much  
My body calls out  
Please, come and touch me  
Too long since I've had some  
I need to feel your touch  
Can't wait 'till we're skin on skin  
Face to face and heartbeats racing  
Subway, taxi, airplane or limousine  
Pick one, oh, anyone  
Come see about me  
It's funny how a week  
Seems like eternity  
  
I want to feel you near  
Can you get here?  
Oh, how I need you so much  
My body calls out  
Please, come and touch me  
Too long since I've had some  
I need to feel your touch  
A phone call won't do, no

I need much more than  
Just to hear from you  
Sleeping by myself  
It just ain't cool, no  
My body's aching, baby  
And the cure is you  
Oh, how I need you so much  
My body calls out  
Please, come and touch me  
Too long since I've had some  
I need to feel your touch  
Oh, how I need you so much  
My body calls out  
Please, come and touch me  
Too long since I've had some  
I need to feel your touch  
It's been too long  
It feels like eternity  
I need to feel you, baby  
Come and touch me
