

Superman (Save You)

The Friday Night Boys

I'm sure, I'm sure
You can't get over, get over this
The fire's burning in your eyes
I'm only keeping you alive If I promise you, promise to never let go
Would you come back to my room?
Would you show me what to do?
I could still save you I can't be superman
And save you, save you
You're falling way too fast to save I swear, I swear, you'll let me down
But every second you're around
You pick me right up off the ground If I promise you, promise to never let go
Would you come back to my room?
Would you show me what to do?
I could still save you I can't be superman
And save you, save you
You're falling way too fast to save No one could help you now
And make it out, make it out
You're falling way too fast to save I'm sure, I'm sure
You can't get over, get over this
But in my eyes I'm keeping you alive I can't be superman
And save you, save you
You're falling way too fast to save No one could help you now
And make it out, make it out
You're falling way too fast to save
You're falling way too fast to save
