

Electric Wizard

Electric Wizard

One day we were sitting
And wondering where it's at
When down came a dragon
With a wizard on his backHe said to us
"Step up, wanna take you for a trip"
Then up we flew off into space
And the astral gates we slipped, alrightLooking back behind us
To the freaks and heads we wave
And off beyond our system out
Until they're deep in spaceAnd on the edge of time and space
There stood two towers black
But on we flew, the wizard knew
There was no turning back
Cast your spell on meHigher and higher
Through the cosmos, we had tripped
Seeing stars turned inside out
We thought our minds had flippedColors swirling, sounds are drifting
Thinking we were dead
The wizard turned and spoke to us
And this is what he saidThrough the virgin universe
Upon his back, we played
Creating and destroying
With the music we madeUndulate the cosmic rhythm
Galaxies were born
Clouds of blue, fluorescent dunes
Spreading out before, yeah
