

Big Sky

Annie Lennox

Big sky, Im gonna hurt you
Big sky, youll remember this
Big sky, up above the rain
How can I ever put a stop to it
Look you in the face again?Big sky, Ill never let you go
Big sky, baby, I told you so
Big sky, look at this swollen pride
I got so busy looking out for you
When were you by my side?When Im breathing, when Im sleeping
I can think of nothing else
All my longing, all my waiting
All the things you never feltAll my weeping, all my wailing
All my standing on the shelf
How am I ever gonna get through this
Back to myself again?Big sky, I never knew you
Big sky, let me down again
Big sky, giving you the blame
How can I ever put a stop to this
Look you in the face again?When Im breathing, when Im sleeping
I can think of nothing else
All my longing, all my waiting
All the things you never feltAll my weeping, all my wailing
All my standing on the shelf
How am I ever gonna get through this
Back to myself again?Wont you say it isnt so
Watch me falling, see me falling
I slip through the vortex of the skyDarkness and light
Its whats inside
Darkness and light
Its whats inside
