

# New Machine

[Chris Whitley](#)

My love don't know from nothing  
My love from out of town  
Well I'm running [Incomprehensible]  
I'm running now Where my love been did around  
She come clean from naked country  
She come clean where the land don't lie  
Well I'm gunning [Incomprehensible]  
I'm gunning now Gasoline roll down her thighs  
On this anvil  
Where they lay her favor down  
Drill and driver  
Burn my blankets on the ground  
On the ground Well I hear no motor scraping  
And I don't hear no engine sound  
All them gears and engineers [Incomprehensible]  
New machine is all around  
New machine is all around  
New machine is all around
