

# In The Cold

Gilad Shane

And the words they take their meaning  
(It's all you said)

And the flame, it loses color  
(It's all you said)

Take, take, take a while, take a while  
(It's all you said)

Take, take, take a while, take a while  
(It's all you said)

Knowing that it's far from over  
This one belongs to you

Time shows us that all that ever mattered  
All that ever mattered leaves us in the cold  
If you ever believe this is what you need  
It will spin around and shatter

Throw you to the floor as it leaves us in the cold  
And the dream you think I'm making  
While the house I built is breaking  
(Breaking)

Take, take, take a while, take a while  
(It's all you said)

Take, take, take a while, take a while  
(It's all you said)

Knowing that it's far from over  
This one belongs to you

Time shows us that all that ever mattered  
All that ever mattered leaves us in the cold  
If you ever believe this is what you need  
It will spin around and shatter

Throw you to the floor as it leaves us in the cold

I remember the train you came in on, everything I want kept calling  
I remember the chill that came over, everything I loved went falling

Time shows us that all that ever mattered  
All that ever mattered leaves us in the cold  
If you ever believe this is what you need  
It will spin around and shatter

Throw you to the floor as it leaves us in the cold

Time shows us that all that ever mattered  
All that ever mattered leaves us in the cold  
If you ever believe this is what you need

It will spin around and shatter  
Throw you to the floor as it leaves us in the cold
