Tried And True

Ween

At the dawn I woke, I was alone rising
I called upon the force of time and space, calling
And as she came to me I fell back down realizing
Oh, that it's cool for you to love me now I'm everything
Everything 'cause tried and true, I see the light in you
Oh, can you dig in my soul, could you smell my whole life?
You bent the edge, eclipsed and turned around aligning
And though the dark sparked rays of violet light blinding
I went about the job of sowing thoughts and feelings
Oh, some were good and some bad, I felt the cries of healing
'Cause tried and true, I see the light in you

Oh, can you dig in my soul, could you smell my whole life?
Rise, my dawn, you've been awake too long
Let me rest in time while I blow your mind
At the dawn I woke I was alone rising, I catch it
I called upon the force of time and space calling, see them
And as she came to me I fell back down realizing, creation
Oh, that it's cool for you to love me now I'm everything, I am
Everything 'cause tried and true, I see the light in you
Oh, can you dig in my soul, could you smell my whole life?
