

# Love In Stereo

## Liquid Soul

She feelin' me though your girlfriend tellin' me you're ready to go  
On the floor to get my attention she dropped it low  
She was so seductive, I'd pay a fee if she'd let me touch it  
I'm outta my mind the way she looked into my eyesShe said if you wanna break it down, if you wanna break it  
down  
We can break it on down right here  
If you wanna break it down, if you wanna break it down  
We can break it on down right hereI said if you wanna break it down, if you wanna break it down  
We can break it on down right here  
If you wanna break it down, if you wanna break it down  
We can break it on down right hereStereo, we can make love in stereo  
I need you both so we can make love in stereo  
Stereo, we can make love in stereo  
I need you both so we can make love in stereoIf you're feelin' me though I know a little place where we can go  
Baby let me know if you need a private show  
We can do whatever, you and her dressed in leather  
What's on your mind? Tell me how to do that one more timeIf you wanna break it down, if you wanna break it  
down  
We can break it on down right here  
If you wanna break it down, if you wanna break it down  
We can break it on down right hereShe said if you wanna break it down, if you wanna break it down  
We can break it on down right here  
If you wanna break it down, if you wanna break it down  
We can break it on down right hereStereo, we can make love in stereo  
I need you both so we can make love in stereo  
Stereo, we can make love in stereo  
I need you both so we can make love in stereoIf you wanna break it down, if you wanna break it down  
We can break it on down right here  
If you wanna break it down, if you wanna break it down  
We can break it on down right hereIf you wanna break it down, if you wanna break it down  
We can break it on down right here  
If you wanna break it down, if you wanna break it down  
We can break it on down right hereStereo, we can make love in stereo  
I need you both so we can make love in stereo  
Stereo, we can make love in stereo  
I need you both so we can make love in stereoSo we can make love in stereo  
So we can make love in stereo  
So we can make love in stereo  
So we can make love in stereo
