

# Hold Your Head Up High

## OVERGROUND ACOUSTIC UNDERGROUND

You said you're just one in the crowd  
but your laughter is way too loud  
you fill the darkest room with light  
your life is complicated too  
but you know just what to do  
the light you give is not in you  
hold your head up high and this pain will die  
somehow somewhere just try  
You're living in the dark where no one can see your tears  
but hold your head up high  
can you tell me that I'm wrong  
don't keep your broken heart too long  
deep inside you're growing strong  
look beyond your life today  
can you see yourself this way  
when the winter cold is gone?  
hold your head up high and this pain will die  
somehow somewhere just try  
You're living in the dark where no one can see your tears  
but hold your head up high  
hold your head up high and this pain will die  
somehow somewhere just try  
Your living in the dark where no one can see your tears  
but hold your head up high
