Shadow Zone

Wolfchild

There are shadow zones all around
We danced thick as trees still prisoners of wood
And in between the smoke and vines on the dancefloor there he stood
I could see in your eyes you're the one to burn it all down
And I want to be there yes I want to be there
So I start the hunt your scent's in my mouth and my thoughts are in the mud
There's quicksand all around me but your rhythm's filled my blood
I can see by your moves you're the one to burn it all down
And I want to be there yes I want to be there
Here I feel your breath but I can't see you oh I guess you're here but I can't touch you
Here I feel your breath but I can't see you oh I guess you're here but I can't touch you
There's a jungle in motion it looks like a dancer
There's a jungle in motion it looks like a dancer
There's a jungle in motion it looks like a dancer
There's a jungle in motion it looks like a dancer
Animals encircle trading fur for skin
And I've been told you're too much for me but this camouflage is wearing thin

I can tell by your touch you're the one to burn it all down
And I want to be there yes I want to be there
Here I feel your breath but I can't see you oh I guess you're here but I can't touch you
Here I feel your breath but I can't see you oh I guess you're here but I can't touch you
There's a jungle in motion it looks like a dancer
There's a jungle in motion it looks like a dancer
There's a jungle in motion it looks like a dancer
There's a jungle in motion it looks like a dancer
Shadows are blindfolds and the pulse is so extreme
Your skin's like heaven down on me there is nothing in between
I can feel from your hips you're the one to burn it all down
And I want to be there yeah I wanna be there
Here I feel your breath but I can't see you oh I guess you're here but I can't touch you
Here I feel your breath but I can't see you oh I guess you're here but

I can't touch you
There's a jungle in motion it looks like a dancer
There's a jungle in motion it looks like a dancer
There's a jungle in motion it looks like a dancer
There's a jungle in motion it looks like a dancer
