

# Ever Again

[Andrew W.K.](#)

People say that we're born with a purpose  
And that we're meant to make our dreams come true  
But if our dreams start to crumble, they can bury us  
Gotta take yourself out and push on through  
They say that nobody changes

But I'm living proof that they do

Because I found the answer

And you can find the answer, too

They made me think I was crazy

And that the fate wants you to stay

Now that I've found the answer

I'm never ever gonna lose my way

Ever again

Ever again

I'll admit there were times I was terrified

I honestly thought I wouldn't survive

But I learned a lot from my trip to the dark side

And from here on out I'll keep my light alive  
They say that nobody changes

But I'm living proof that they do

Because I found the answer

And you can find the answer, too

They made me think I was crazy

And that the fate wants you to stay

Now that I've found the answer

I'm never ever gonna lose my way

Ever again

Ever again

Ever again

Ever again

Ever again

Ever again

Ever again

Ever again
