

This Is the Love

Spandau Ballet

This is the love
This is the love

I was miles away
Lost within another day
Stepping out the feet of clay
To get by

Couldn't buy more time
Couldn't even spend a dime
And then the world went all sublime
You came by

This is the love
This is the love

This is the love
This is the love

I was waiting on a train
That wouldn't come again
Then you pass like summer rain
Now this is the love

These streets were all I knew
Couldn't find a map to you
No one could tell me what to do
I was right

These walls we build real high
Somehow you could touch the sky
You tore the roof right off the line
Now we fly

This is the love
This is the love

This is the love
This is the love

I was working on a scheme
To build a wall man seen
Now I'm looking at a dream
Cause this is the love

When the lights turning blue
And the radio is on
We have songs in my head
And the frequency strong

But time runs away
And the days don't seem long
You know that you're found
We want to belong
Sing our song

I was waiting on a train
That wouldn't come again
Then you pass like summer rain
Now this is the love

This is the love
This is the love

This is the love
This is the love

When the lights turning blue
And the radio is on
We have songs in my head
And the frequency strong

When the lights turning blue
And the radio is on
We have songs in my head
And the frequency strong

When the lights turning blue
And the radio is on
We have songs in my head
And the frequency strong
