Not For Free

Face to Face

You want what you think you need
But what you really need
Isn't anything that you wantYou think that you've got it made
But it's what you don't know
That is gonna pull you down, down, downIt's not for free, no
It's not for free, noYou want what you think you need
But what you really need
Isn't anything that you wantStand back, take a step aside
Take a look at yourself
Put away your stupid prideIt's not for free, no
It's not for free
